## COLUMN

### Power and Toughness

- Power and toughness are located in the lower right of the creature card
- Power is the amount of damage dealt when attacking an enemy
- Toughness is the amount of damage the creature can withstand

Don't forget to explain.

**Example:** You attack with a creature that has 3 power and 3 toughness, or in other words, a 3/2 creature. Then your opponent blocks that attack with a 2/4 creature.

**Result:** Your opponent is not dealt damage, since the attack was blocked

- Your opponent's creature has 4 toughness, which is more than your creature's 3 power. Therefore, 4 is not destroyed
- Your creature has 3 toughness, which is equal to the blocking creature's power of 3. Therefore, your creature is destroyed
